ELSEVIER

European Journal of Operational Research 108 (1998) 711–713

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 108

1 Combined location–routing problems: A synthesis and future research directions
H. Min, V. Jayaraman and R. Srivastava

16 Solution procedures for sizing of warehouses
A.K. Rao and M.R. Rao

26 Optimal placement of add/drop multiplexers: Static and dynamic models
G. Belvaux, N. Boissin, A. Sutter and L.A. Wolsey

36 Move based heuristics for the unidirectional loop network layout problem
B.C. Tansel and C. Bilen

49 Flexible machine layout design for dynamic and uncertain production environments
T. Yang and B.A. Peters

65 Economic design of screening procedures when the rejected items are reprocessed
S.H. Hong, S.B. Kim, H.M. Kwon and M.K. Lee

74 Analysis of a single-stage, single-product, stochastic, MRP-controlled assembly system
W.E. Wilhelm and P. Som

94 Perception and information in a competitive location model
H.A. Eiselt

106 Kohonen maps for solving a class of location–allocation problems
S. Lozano, F. Guerrero, L. Onieva and J. Larrañeta

118 Efficient solution procedure and reduced size formulations for *p*-hub location problems
J. Sohn and S. Park

127 Stability regions for maintaining efficiency in data envelopment analysis
L.M. Seiford and J. Zhu

140 Small-sample properties of ML, COLS, and DEA estimators of frontier models in the presence of heteroscedasticity
A.N. Bojanic, S.B. Caudill and J.M. Ford

149 On alternative optimal solutions in the estimation of returns to scale in DEA
L.M. Seiford and J. Zhu

153 Probabilistic judgments specified partially in the Analytic Hierarchy Process
I. Basak

165 Aggregating individual judgments and priorities with the Analytic Hierarchy Process
E. Forman and K. Peniwati

170 Probability distributions of cost, revenue and profit over a warranty cycle
H. Polatoglu and I. Sahin

184 Call option pricing and replication under economic friction
R. Östermark

196 A dual ascent method for the portfolio selection problem with multiple constraints and linked proposals
S.S. Syam

208 Non-cooperative negotiation strategies for vendor selection
C.A. Weber, J.R. Current and A. Desai

224 Addressing the multigroup discriminant problem using multivariate statistics and mathematical programming
R. Östermark and R. Höglund

239 Biologically inspired operations research
E. Gelenbe

241 Neural and delay based heuristics for the Steiner Problem in networks
A. Ghanwani

266 Neural networks for image and video compression: A review
C. Cramer
283 Improved exploration in Hopfield network state–space through parameter perturbation driven by simulated annealing
G. Papageorgiou, A. Likas and A. Stafylopatis
293 G-networks with multiple classes of signals and positive customers
E. Gelenbe and A. Labed
306 Autonomous vehicle navigation using evolutionary reinforcement learning
A. Stafylopatis and K. Blekas
319 Autonomous search for mines
E. Gelenbe and Y. Cao
334 Reliable tool replacement policy for quality and cos
A. Jeang
345 A generalized age and block replacement of a system subject to shocks
Shey-Huei Sheu
363 Two-stage generalized age maintenance of a queue-like production system
G.C. van Dijkhuizen and A. van Harten
379 Class dependent departure process from multiclass phase queues: Exact and approximate analyses
S. Dasu
405 A generalization of symmetric queues
D. Fakinos
409 A finite source retrial queue
G.I. Falin and J.R. Artalejo
425 Analysis of a versatile multi-class delay–loss system with a superimposed Markovian arrival process
U.R. Krieger, V. Naoumov and D. Wagner
438 The weighted Russell measure of technical efficiency
J. Ruggiero and S. Bretschneider
452 Computational implementation of Fujishige's graph realizability algorithm
A.I. Ali and H.-S. Han
464 Cardinality and the Borda score
T. Marchant

473 Computing closely matching upper and lower bounds on textile nesting problems
R. Heckmann and T. Lengauer
490 Integrated defect detection and optimization for cross cutting of wooden boards
M. Rönnqvist and E. Åstrand
509 4-Block heuristic for the rectangle packing problem
G. Scheithauer and U. Sommerweiß
527 Distribution network optimization: Finding the most economic solution by using genetic algorithms
L. Castillo and A. González
538 The General Routing Problem polyhedron: Facets from the RPP and GTSP polyhedra
A. Corberán and J.M. Sanchis
551 Performance characteristics of alternative genetic algorithmic approaches to the traveling salesman problem using path representation: An empirical study
L.J. Schmitt and M.M. Amini
571 An efficient composite heuristic for the symmetric generalized traveling salesman problem
J. Renaud and F.F. Boctor
585 Constructing a course schedule by solving a series of assignment type problems
A. Hertz and V. Robert
604 Heuristic sensitivity analysis in a combinatoric environment: An exposition and case study
M.M. Amini, M. Racer and P. Ghandforoush
618 Solving the generalised assignment problem using polyhedral results
D. Cattrysse, Z. Degraeve and J. Tistaert
629 A branch-and-bound algorithm for the quadratic assignment problem based on the Hungarian method
P. Hahn, T. Grant and N. Hall
641 Simulated annealing for the unconstrained quadratic pseudo-Boolean function
T.M. Alkhamis, M. Hasan and M.A. Ahmed

653 Computational assessment of distributed decomposition methods for stochastic linear programs
H. Vladimirou
671 Mixed-integer column generation algorithms and the probabilistic maximum satisfiability problem
P. Hansen, B. Jaumard and M. Poggi de Aragão
684 A procedure to verify the completeness of the right-hand-side parametric analysis for a mixed integer linear programming problem
A. Crema
696 On consistency in probabilistic logic for logical formulas represented by *B*-hypertrees
K.A. Andersen
710 Feature Issue Twelfth EURO Summer Institute: Locational Analysis
J. Moreno and J. Barceló (Guest Editors)
711 Contents Volume 108
